EasyChat

Lucas Ross and Finn Taylor

BEFORE EASYCHAT

AFTER EASYCHAT

Basic Idea

-We wanted to create a chatbot

-Combat loneliness (for stinky cs students)

-Help to strengthen social capabilities for introverted individuals whom are definitely in need of this fine skill, perchance they will be able to have stronger social capabilities, given that they use our wonderful project, for this skill truly is important.

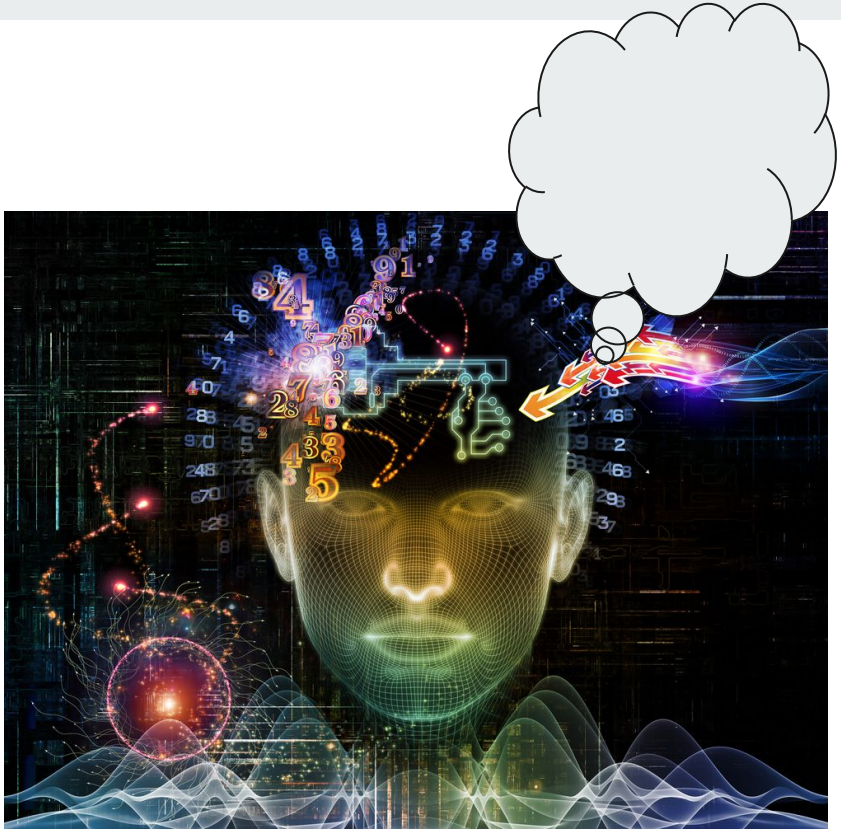
Problem Statement

-Do the machine learning using NLTK

-Simple yet accurate responses

-Using large* datasets

-decision tree



Final Features

-Decision Tree finalized with dataset

-Chatbot chats back :)

Machine Learns

-Our machine learns

-Using a Tree

-It has 64% accuracy :(

-Classification model is best.
